

BASANI RAGHAVENDRA SAI TEJA

9390921929 | raaghasai@gmail.com | [LinkedIn-Profile](#) | [Leetcode-Profile](#)

PROFESSIONAL SUMMARY

AI Engineer & Full-Stack Developer specializing in Autonomous Agents, LLM Integration, and Industrial IoT. Final-year B.Tech (EEE) student with a proven track record of architecting distributed edge-to-cloud telemetry pipelines and engineering autonomous web agents. Demonstrated deep technical discipline with 150+ LeetCode problems solved, holding consecutive 50-Day Coding and Monthly Challenge badges.

EDUCATION

B.Tech – Electrical and Electronics Engineering

Hyderabad | 2023 – 2026

(GPA: 8.67) | Gokaraju Rangaraju Institute of Engineering and Technology

Diploma – Electrical and Electronics Engineering

Hyderabad | 2020 – 2023

(GPA: 9.81) | Government Polytechnic College, Masab Tank

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), Java, SQL.
- **Backend & APIs:** Node.js, Express.js, REST API Design, Web Automation (Playwright).
- **Frontend Development:** React.js, Tailwind CSS, HTML5/CSS3.
- **Databases & Cloud:** MongoDB (Atlas / Time-Series), MySQL, PostgreSQL, MQTT (HiveMQ), Render, Vercel.
- **AI Integration:** LLM API Integration (OpenAI/Claude), Applied Prompt Engineering.
- **Core CS & Tools:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Git/GitHub, VS Code

EXPERIENCE

AI Engineer Intern | Nhancio Technologies

Hyderabad (Remote) | Jan 2026 – May 2026

- **Autonomous Web Automation:** Currently architecting an end-to-end AI recruitment agent utilizing Browser-use and Playwright to autonomously navigate complex job board workflows (LinkedIn, Naukri).
- **Intelligent Information Extraction:** Developing a dynamic parsing pipeline that actively scrapes candidate profiles and leverages LLMs (GPT-4/Claude) to synthesize high-quality, ATS-optimized resumes.
- **Resume Scoring Engine:** Prototyping a semantic analysis NLP tool to evaluate candidate experience against target job descriptions, building towards a fully automated matching score algorithm.
- **Form-Filling Intelligence:** Integrating an autonomous logic layer designed to interpret dynamic web forms and map unstructured user experience data into complex application fields

PROJECTS

Industrial IoT Digital Twin for CNC Laser Systems |

[\[Github\]](#) | Feb 2026 – April 2026

Node.js, React, ESP32, MQTT, MongoDB, AWS

- **Real-time Data Pipeline:** Engineered a high-frequency telemetry pipeline using MQTT and WebSockets to stream live 3D vibration (ADXL345) and thermal data from ESP32 edge sensors with sub-500ms latency.
- **High-Availability Backend:** Developed a dual-layer storage strategy using Redis for real-time caching and MongoDB Time-Series collections for persistent historical logging, preventing UI crashes during high-throughput events.
- **Machine Learning Watchdog:** Deployed a Python microservice running Scikit-Learn's Isolation Forest algorithm to establish a dynamic CNC kinematic baseline, autonomously detecting and logging tool chatter and axis collisions.
- **Deployment:** Orchestrated a decoupled cloud infrastructure, hosting the Node.js/Express gateway on Render for continuous backend processing, and deploying the React command center to the Vercel Edge Network for global CDN delivery.

CERTIFICATIONS & HIGHLIGHTS

- **Algorithmic Discipline:** Solved 150+ LeetCode problems, earning the prestigious [50-Day](#) Coding Streak and consecutive Monthly Challenge Badges ([Feb/March](#) 2026).
- **Certifications:** [AWS Certified Developer](#) (Associate), [Data Structures and Algorithms](#) (Smart Interviews), [Python Programming](#) (AI Techies).
- **Focus:** Deeply passionate about backend optimization, cloud infrastructure, and applying AI to automate industrial systems.
